

Tala Saleh

Amman - Jordan

I'm a recent Cybersecurity graduate with a strong academic background (GPA 3.72 - Excellent) and hands-on training through programs at the National Cybersecurity Center and Green Circle Cyber Security Company. Over the past few years, I've worked on projects in areas like SIEM, risk management, reverse engineering, and systems analysis, applying what I learned in class to real-world challenges. Proficient in C++, Linux, HTML/CSS, and JavaScript, and certified in CCNA. I'm now looking for an opportunity whether a training program or a junior role where I can grow, contribute, and be part of something meaningful.
